# Enhanced Comfort

Bryant knows that many homeowners spend more time inside than out. That's why it's so important to fine-tune your comfort beyond the basics of temperature control. Bryant® humidifiers, dehumidifiers and ventilation products go that extra step to provide relief from hot and humid summers, overly dry heated winter air, and stale air in airtight homes. By addressing these comfort needs, you'll enjoy the added benefits of reducing airborne pollutants, increasing heating and cooling system efficiency and prolonging the life of your indoor furnishings.

## Humidifiers

In the winter, the air in your home can be dryer than the desert! That overly dry air can cause itchy, cracked skin, dry nasal passages and nosebleeds, itchy eyes, annoying static shocks, and cracked woodwork. Adding a Bryant® humidifier can help alleviate these conditions while also minimizing the opportunity for dust and other irritants to circulate in the air that you breathe. Bryant humidifiers can even help you save money on your heating bills, because if you feel warmer, you can turn down the thermostat. From our most basic, bypass humidifier to our highest capacity steam model, your Bryant dealer can help you determine which humidifier option is best for you.

Large Fan-Powered Humidifier

Steam Humidifier

Small Fan-Powered Humidifier

Small Bypass Humidifier

### VERSATILITY AND PERFORMANCE

Bypass and fan-powered models deliver water vapor quietly and efficiently. Water saver models convert 100% of the water used. Our steam model delivers high temperature water vapor with its unique dispersion tube and offers our highest available capacity for larger homes.

### SIMPLE MAINTENANCE

All of our humidifiers are designed with easy access for replacement of the water panel or steam canister.

### LIMITED WARRANTY

To the original owner, Bryant® humidifiers are covered by a ten-year parts limited warranty upon timely registration. The limited warranty period is five years if not properly registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty. See warranty certificate at [bryant.com](http://bryant.com) for complete details and restrictions.

## Dehumidifiers

When it's hot and sticky outside, your air conditioner or heat pump can work overtime. This often causes indoor humidity levels to creep upward, making you and your family uncomfortable and vulnerable to potential mold and dust mites. A Bryant® whole-home dehumidifier can address these issues and enhance your comfort by drawing excess moisture from cool indoor air. To ensure continued, optimum performance, clean filter reminders help encourage timely routine maintenance.

Dehumidifier

### USER FRIENDLY

Setting your desired humidity level is easy and intuitive using the on-board LCD control. For greater flexibility and convenience, the control also comes off the unit for wall mounting if needed. The whole-home dehumidifier can also be controlled with a Preferred™ Series humidity-sensing thermostat or an available remote control for maximum convenience.

### INSTALLATION VERSATILITY

Offered in a variety of installation options ranging from basement, closet, attic, crawl space, or stand alone, your dealer has the flexibility to offer the ultimate combination of unobtrusive design and customer convenience.

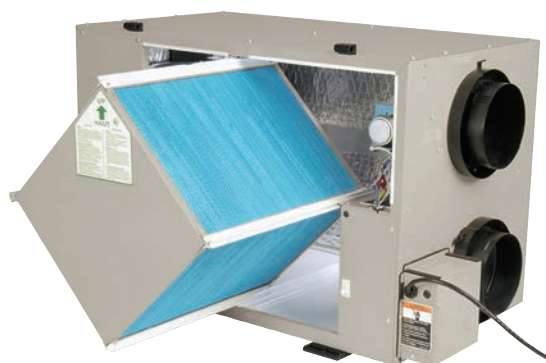

### LIMITED WARRANTY

To the original owner, Bryant® dehumidifiers are covered by a five-year parts limited warranty. See warranty certificate at [bryant.com](http://bryant.com) for complete details and restrictions.

## Fresh Air Ventilation

Newer, tightly constructed homes are designed to conserve energy. At the same time, they can trap airborne particles, gases, unpleasant odors and moisture, allowing them to recirculate throughout your living spaces. These airtight homes provide no way to refresh the indoor environment.

Bryant® fresh air ventilators work behind the scenes to bring pre-filtered outdoor air into your home, replacing the stale, polluted air trapped inside and recirculating through the air you breathe. It's like opening a window without losing indoor comfort or wasting your energy dollars.

ERV/HRV High-Efficiency Core

Horizontal ERV/HRV

Vertical ERV/HRV

Compact Side Ports ERV/HRV

Compact Top Ports ERV/HRV

### HRV

If you live in a colder winter climate with moderate or low summer humidity, such as Canada or the northern United States, and would like to keep the air inside your house fresh, you may want to consider an HRV. Its special cross-flow core transfers indoor heat energy to the incoming air so you can have fresh air even on extreme, cold days.

### HIGH-EFFICIENCY CORE

The high-efficiency core transfers heating or cooling energy from exiting stale indoor air to the incoming outdoor air. The air streams DO NOT mix, yet you continue to enjoy heating or cooling comfort and economy. On our ERV models, the core also helps maintain proper humidity to maximize comfort.

### WALL CONTROL

Just set the standard wall control and let the system do the rest. For precise, total system integration and control, ask your Bryant dealer about the Evolution® Connex™ Control.

### LIMITED WARRANTY

To the original owner, Bryant® heat recovery and energy recovery ventilators are covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not properly registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty. See warranty certificate at [bryant.com](http://bryant.com) for complete details and restrictions.

### ERV

If you live in a hot, humid summer climate, such as the Midwest or southern states, you may want to consider an ERV. Use it year round. Its special, enthalpic transfer media core will help transfer indoor heating or cooling energy to the incoming air so you can have fresh air even on extreme days.

## Legacy™ Line Energy Recovery Ventilator (ERV)

Enjoy an infusion of fresh air and the removal of unseen pollutants, all while maintaining energy-efficient indoor comfort. This uniquely designed ventilator can mount directly onto your furnace or return duct. As a Legacy™ Line product, count on it to be a lasting fresh air solution without breaking the bank. You can have fresh air year round - even on extreme days. It's a much better fresh solution than opening a window and letting your energy dollars fly out.

**LEGACY™**  
**LINE**

### COMPACT VERSATILITY

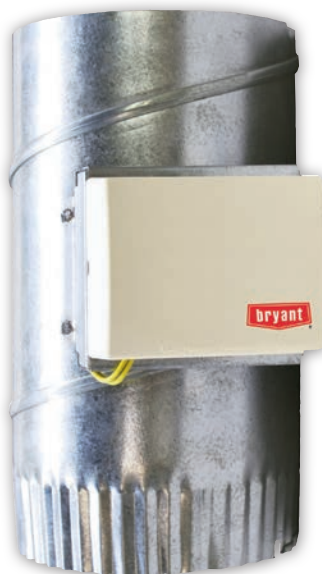

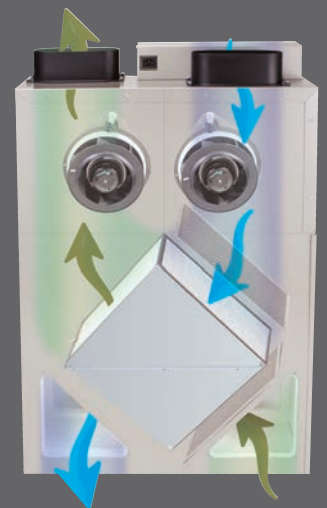

Our Legacy™ Line energy recovery ventilator mounts directly to your furnace or ductwork for attractively priced, whole-home fresh air in homes where space is at a premium.

### APPLICATION FLEXIBILITY

Its unique design and compact size makes it easy to install in virtually any application. And with only two ducts coming out of the unit instead of four like on other ERVs, it requires less room and time to install.

### LIMITED WARRANTY

To the original owner, Bryant® energy recovery ventilators are covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not properly registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty. See warranty certificate at [bryant.com](http://bryant.com) for complete details and restrictions.

## Fresh Air Vent

The fresh air vent provides an alternative, economical solution to bring fresh air into your home. Although it doesn't have the heat exchange capabilities of an ERV or HRV, fresh air is introduced in a controlled way. It's the perfect solution in regions where building codes require fresh air ventilation.

### LIMITED WARRANTY

To the original owner, the Bryant® fresh air vent is covered by a five-year parts limited warranty. See warranty certificate at [bryant.com](http://bryant.com) for complete details and restrictions.

# Top Reasons It Takes Bryant

## EXCEEDING EXPECTATIONS

With more than 100 years of experience, Bryant offers a full lineup of products designed with whole-home comfort in mind. Through innovative design and rigorous testing, our products are built to exceed expectations, backed by Bryant® warranty protection.

## NEW CONVENIENCES

With a diverse line of products to address almost any need, from hot or cold spots, to improving indoor air quality and programmable thermostats with Wi-Fi® capabilities, convenient comfort can be yours when you choose Bryant.

## PASSIONATE SERVICE

Bryant dealers do more than just deliver quality comfort system enhancements like our comfort-enhancing indoor air quality products. They also deliver knowledge, experience and Whatever It Takes® to get each job done right, the first time. You and your system will receive the attention to detail and professional service delivered only by Bryant® dealers.

## CUSTOMIZED COMFORT SOLUTIONS

Healthy home solutions are not one size fits all. Our dealers provide solutions based on your specific needs. From financing and rebates to reliable products professionally installed, Bryant provides options that help keep you and your wallet comfortable.

## EFFICIENCY AND SAVINGS

Products designed to enhance indoor air quality can keep your system running cleaner to help maximize efficiency and reduce energy consumption. By reducing monthly utility bills over the life of your system, you'll see how efficient equipment pays off.

## Fine-Tune Your Comfort

There is a Bryant® indoor air quality product for almost any comfort need or budget. Your Bryant dealer can help you decide which is right for you.

	HEALTHY AIR	COMFORT	SAFETY	EFFICIENCY
HUMIDIFIERS	Properly humidified air provides relief from itchy, cracked skin, itchy watery eyes, dry nasal passages, cracked woodwork.	Dry winter air can feel cold and uncomfortable. Add a humidifier to make heated air more comfortable.		When you feel comfortable at lower heated temperature settings, you can save on your heating bill.
DEHUMIDIFIERS	Overly moist air can become a breeding ground for irritants that can affect allergy symptoms. A dehumidifier can help resolve these issues.	A dehumidifier can provide soothing relief from hot, sticky summer humidity.		Feeling more comfortable at higher temperatures in the summer can lead to savings on the electric bill.
HRV/ERV/ FRESH AIR VENT	Minimize the effects of household pollutants from air fresheners, personal care products, paint, glue, plastics and carbon monoxide.	Fresh air ventilation provides relief from stale air and odors without opening a window and letting hot summer or cold winter air into the home.		Much more efficient than opening a window and letting heated or cooled air escape.

For more than a century, homeowners have associated Bryant® heating and cooling products with the highest standards of indoor comfort and Bryant dealers as service leaders. Through commitment and dedication of our product development and manufacturing teams, we have consistently met every new challenge head-on and delivered the products to meet or exceed expectations. Our national network of passionate Bryant dealers is at the forefront of our success. Knowledgeable in the field, and equipped to address your home comfort needs, our dealers deliver customized comfort solutions to you and your family by doing...
