

Versatec Compact

Commercial 1/2 to 6 Ton
Water Source/Geothermal Heat Pump

VERSATEC COMPACT

The Versatec Compact provides a true value product to our commercial water source heat pump line. This product is engineered to offer high efficiency operation while maintaining a small cabinet footprint and an impressive list of value-added features. With its compact design and ability to perform optimally in both water loop and geothermal applications, the Versatec Compact is an ideal solution for both retrofit and new construction applications.

The Versatec Compact model exceeds ASHRAE 90.1 efficiencies while utilizing environmentally friendly R410A refrigerant. It is available in a wide selection of capacities (006-070 MBtuh output) to offer unmatched application flexibility.

Versatec Compact: Value and performance redefined.

KEY FEATURES

COMPRESSOR: Scroll single speed, in commercial voltages. Compressor blanket option available for improved noise reduction.

BLOWER INLET RINGS: Allow for easy motor and blower removal without disconnecting from the unit duct work.

FILTER: 1" MERV 4 disposable filter with filter rail is standard while a 2" pleated MERV 13 and deluxe filter rack are optional. Field switchable from 1" or 2" filters.

CABINET: Small footprint ideal for retrofit applications. Heavy gauge, environmentally responsible galvanized steel for maximum corrosion resistance. Standard foil-faced cabinet insulation for improved air quality and easy cleaning.

BLOWER MOTOR: PSC blower motors provide high efficiency while allowing quiet operation and wide range of airflow selections. Optional X13 and variable speed ECM 2.3 blower motors are available for improved efficiency and comfort.

CONTROLS: Aurora microprocessor control is standard. Optional Aurora Universal Protocol Converter (UPC) control is available featuring N2, LonWorks, and BACnet compatibility.

DRAIN PAN: Corrosion-resistant composite drain pan is standard while an optional stainless steel drain pan is available.

WATER VALVE: Optional factory-installed, low pressure drop (high Cv) water solenoid valve for variable speed pumping applications. Feature complies with ASHRAE 90.1 standard requirement for WSHP. Pair with optional Automatic Water Flow Control Valve to ensure proper water flow rate.

ALUMINUM AIR COIL: An aluminum air coil is featured in all Versatec Compact units to provide exceptional durability and high efficiencies. Added protection is also available with an optional AlumiSeal™ coating.

THERMASHIELD™: Optional WaterFurnace-exclusive coating applied to water-to-refrigerant heat exchanger that protects against condensate damage in extended range applications (below 50°F).

ADDITIONAL OPTIONS:

- COMPRESSOR PHASE GUARD PROTECTION
- ROTARY 'DIAL' TYPE INTERNALLY WIRED NON-FUSED DISCONNECT

VERSATEC COMPACT VERTICAL 1/2 to 6 Ton

10% FEDERAL TAX CREDIT

A 10% Federal Energy Tax Credit and 5-year accelerated depreciation deductions are available for costs associated with energy property using geothermal heat pumps, construction of which must begin before January 1, 2022. The geothermal equipment must be located in the United States and use the ground or ground water as a thermal energy source for heating or thermal sink for cooling. IRS Form 3468 can be used to claim the energy credit which may be used to offset both regular income taxes and alternative minimum taxes. If the tax credit exceeds the income tax liability, the loss can be carried back one taxable year and the remaining balance can be carried forward into future years. Contact your tax professional for more information.
